**IZGLĪTĪBAS INOVĀCIJU PĀRNESES CENTRS**

# BENEFITS AT ORGANIZATIONAL LEVEL

- Gained very important experience in realization ERASMUS+ projects (management and evaluation)
- Exchanged our knowledge and experiences
- Expanded knowledge of the education systems in Europe (PT, LT, UK)
- Developed and enriched the teaching methods connected with the language learning with technology, contributing to the improvement of the quality of our work
- Established international contacts, etc.

# PROJECT IMPACT ON OUR ORGANIZATION

- The project raised our organization's status and credibility at the local and international arena.
- At the local arena project enhances the organization's publicity:
  - 2015-28-08, Workshop for language teachers
  - September, 2015, TV reportage
  - 2016-18-08, International workshop/ Final conference
- At the international arena
  - International contacts as well as personal contacts with colleagues from other countries
  - Cooperation and contacts will be the basis for a new development projects in the future

# BENEFITS AT INDIVIDUAL LEVEL

- Exchanged our knowledge and experiences
- Obtained new skills and knowledge
- Motivation and encouragement for obtaining new experience, especially at the international level
- Growing desire to know more about other cultures; to travel, to meet people from other countries
- Increased self-esteem and helped rid of complexes, above all to overcome psychological barriers to speak English
- Improving language competence and learning motivation, also communicative skills

# CHALLENGES

- It was the **first call** for proposals in the framework of programme Erasmus+
  - Sometime we do not realize the difference between Erasmus+ and Grundtvig, in particular the financial document issues
  - It had no experience / practice, how to implement the project
  - Only now is a unified reporting system (e.g., different in Latvia and Romania)
- Although the project is in the school sector actually **only one partner** (LT) dealing with languages teaching for pupils
  - Different understanding of the tasks to be accomplished
  - Materials in Toolkit
- **Used excellent approaches** to achieve the "tangible" results of the project and to increase the project implementation quality:
  - Each partner makes a presentation on the local activities during the transnational meetings
  - For each meeting, each partner prepares 3 video
  - After each transnational meeting organizer writes Minutes, compiles presentations and photos

# LESSONS LEARNED

- How it is interesting and useful to participate in the international project!
- Learning by doing and learning on the spot!
- We are REALLY learning all our life!
- We have what to teach our guests from other countries and we can learn from them
- Everyone can speak and is heard
- We have a lot of new friends in different European countries
- We can speak different languages
- **Project never ends!**

# RESULTS

- **The greatest value of the project:**
  - An opportunity to gain new experiences
  - To compare and discuss our achievements / methods with colleagues from other countries
  - To learn about other cultures
  - To meet people from other countries etc.
- **The most visible results of the project:**
  - VIDEOS
  - Project Monitoring And Evaluation Instruments (questionnaires)
  - Toolkit
- It can be said that the project objectives achieved
