## Cooperation to strengthen the citizens' math skills in the context of sustainable development and welfare

### Aim of the project

Activate the role of mathematics in the region's sustainable development by identifying the citizens' math educational needs and developing recommendations to adult education providers about basic mathematical skills promotion as well as to promote different types of organizations' contribution in the mathematics further education development within life-long learning context.

**MathPRO**

### Project results

**Research** identifying mathematics continuing education supply in Latvia, Lithuania and Estonia and mathematical education needs of Baltic States citizens.

**Transnational comparative study** on the math educational needs in Baltic States.

**Survey** (online questionnaires) - employers and the citizens' questionnaires in five languages: English, Latvian, Estonian, Lithuanian and Russian, available at [www.mathpro.iipc.lv](http://www.mathpro.iipc.lv).

**Database** contains the results of the survey done in Latvia, Estonia and Lithuania.

Three **seminars-discussions** concerning various aspects of citizen' mathematics skills promotion: in Estonia on April - June, 2014, in Latvia on August 20, 2014 and in Lithuania on September 10, 2014.

### Recommendations:

- Recommendations for the adult education providers about basic mathematical skills promotion;
- Recommendations for adult math further education methodological provision;
- Description of the different organizations involvement possibilities in basic mathematical skills promotion.

**Methodological platform** with the most popular web-pages in each partner country to help person to use such elementary mathematics calculations as salary, taxes and loans, currency exchange and other accounting.

**Guide for adult educators** (in English and Latvian—print version; in Russian, Estonian and Lithuanian—CD).
